- ◎ Clinical Chemistry Reagents
- ◎ Coagulation Analyzer Reagents
- ◎ After-sales Service

Biolot Diagnostics (Wuhan) Co., Ltd.

Biolot Diagnostics originated from the former Beijing Institute of Medical Devices and was founded in 2001. The company has over 20 years of experience in the field of IVD reagents. We specialize in the development, production and distribution of high quality affordable consumables for clinical chemistry analyzer, chemiluminescence immunoassay analyzer, coagulation analyzer, urine analyzer, hematology analyzer and blood gas analyzer etc.

Since 1989, we have carried out research on clinical electrodes and reagents and published several papers.

Beginning in 1992, we started the R&D and production on Orion electrodes and reagents for sodium potassium analyzer.

Since 1996, we have developed and produced AVL electrolyte reagents, electrodes, and AVL blood gas reagents.

Since 2001, we have been working on improving foreign formulas, we were the first in China to launch cleaning solutions and reagents for various clinical chemistry analyzers, such as Hitachi, Olympus, Abbott, Toshiba, Beckman and Roche etc. So far, we have provided cleaning reagents for thousands of large-scale biochemical instruments of various brands both at home and abroad, we can also provide OEM/ODM services for clients all over the world.

In 2002, we were the first to launch electrolyte reagents for Hitachi, Abbott, Roche, Toshiba, and Olympus biochemistry analyzers in China, filling the blank space in domestic market. After years of research and improvement and user testing, in 2008, we began to exclusively launch formaldehyde-free and environmentally friendly improved ISE reagents for Hitachi, Olympus, Roche, Beckman, Toshiba, Abbott, Siemens, Sysmex, Mindray, and Dirui systems.

In 2003, we were the first company in China to launch concentrated wash buffer specifically for the Abbott I2000 immunoassay analyzer, we can now provide chemiluminescence immunoassay cleaning buffers and detergents for Roche, Abbott, Beckman, Siemens and other immunoassay systems.

In 2010, an office was established in Toronto, the fourth largest city in North America.

In 2013, a new production and R&D building of nearly 10,000 square meters was built in Wuhan to expand production capacity to meet the rapidly growing market demand, while providing customers with better and more convenient services. The company has laid a solid foundation for further sustained and rapid development.

So far, Biolot has its home base in Beijing and an R&D center in Wuhan, we have a professional and innovative team dedicated to creating the most reliable diagnostic products for people all over the world.

C 目录 CONTENTS

3-19 → ISE Reagents and Cleaning Detergents for Clinical Chemistry Analyzers, Accessories & Maintenance Service

- 5 ... For Hitachi series clinical chemistry analyzers
- 7 ... For Beckman AU series clinical chemistry analyzers
- 9 ... For Roche series clinical chemistry analyzers
- 11 ... For Toshiba (Canon) series clinical chemistry analyzers
- 13 ... For Siemens series clinical chemistry analyzers
- 15 ... For Abbott series clinical chemistry analyzers
- 17 ... For Sysmex series clinical chemistry analyzers
- 18 ... For Mindray, Dirui and Furuno series clinical chemistry analyzers
- 19 ... For Beckman DxC series clinical chemistry analyzers

20-28 → Buffers and Consumables for Chemiluminescence Immunoassay Analyzers

- 22 ... **For Roche chemiluminescence immunoassay analyzers**
- 24 ... For Abbott, Siemens, Beckman, Ortho series chemiluminescence immunoassay analyzers
- 26 ... For Liaison, Tosoh, Mindray, MAGLUMI, Auto, Maccura, YHLO, Sysmex ... chemiluminescence immunoassay analyzers
- 27 ... For Siemens BN, Beckman Image specific protein analyzer

28-29 → Cleaners for Coagulation Analyzers

29 ... For ACL, Sysmex, Stago, Sekisui, BE, Mindray, Succeder...coagulation analyzer

30-31 → Detergents & Buffers for Various Clinical Analyzers

For blood rheology analyzer, urine analyzer, hematology analyzer, feces analyzer, electrolyte analyzer, blood gas analyzer...

32 → **OEM Service:** for various cleaning detergents, blood gas reagents etc.

32 → **Worry-free After-Sales Service**

Clinical Chemistry Analyzer:

ISE Reagents

(environmentally friendly & formaldehyde-free type)

Cleaning Solutions, Equipment Maintenance & Repair Service

For Hitachi, Beckman (AU/DxC/CX), Roche, Siemens, Canon (Toshiba), Abbott, Sysmex, Mindray, Dirui, Furuno...
Series Clinical Chemistry Analyzers
Environmentally Friendly ISE Reagents

Safe and formaldehyde-free

Biolot is the leading pioneer in the field of ISE reagents, clinical chemistry & immunoassay reagents of the domestic market

- ◇ The leading pioneer in ISE reagents, clinical chemistry and immunoassay reagents;
- ◇ Since 1989, we have focused on the research and application of ion selective electrodes (ISE) for more than 30 years, we have laid a solid foundation in the field of ISE reagents;

Biolot's formaldehyde-free improved biochemistry ISE reagent is safer and more stable

- ◇ Formaldehyde (also known as formalin) is a traditional additive in ISE reagents. It is used in reference solutions, diluents, buffers, standard solutions, calibrators etc. Through years of extensive cooperation and research, Biolot has completely abandoned formaldehyde. The new reagents are environmentally friendly, more friendly to electrodes and more stable, and have no influence on testing results;
- ◇ Received funding from the Beijing Natural Science Foundation, and won the second prize for invention jointly issued by five departments including the Beijing Municipal Science and Technology Commission and the Municipal Association for Science and Technology;

Verified by many customers

- ◇ Withstood the use and verification of tens of thousands of clinical chemistry analyzers in the past decades;
- ◇ Our cleaning detergents can completely substitute the original products; long-term use not only cleans thoroughly, ensures testing results, it also protects the reaction cup, sample needle and pipeline system;
- ◇ In accordance with the NCCLS EP9-A2 guideline, our formaldehyde-free ISE reagents had gone through evaluation, and comprehensive tests were conducted on the biochemistry analyzers. The results showed the electrode calibration data, quality control were very satisfactory.

For Hitachi Series Clinical Chemistry Analyzers

ISE Solutions and Detergents for Hitachi Chemistry Systems

Buffers and Consumables for Chemiluminescence Immunoassay Analyzers

Leading Pioneer in the Field of Immunoassay Reagents in the Domestic Market

For Various Types of Chemiluminescence Immunoassay Analyzer

- ◇ For Roche Series
- ◇ For Abbott i1000/i2000/i4000, AxSYM, Alinity ci Series
- ◇ For Siemens ACS, Centaur, Atellica Series
- ◇ For Ortho Vitros
- ◇ For DiaSorin LIAISON, TOSOH, Mindray, MAGLUMI, Auto, Maccura, YHLO, Sysmex... Series

Verified By Many Customers' Long-term Use

In accordance with the NCCLS EP9-A2 guideline, we have tested thoroughly on our immunoassay reagents for Roche and Abbott systems, the results were very satisfactory.

Highly Recommend:

Buffers and Detergents for Roche Series Chemiluminescence Immunoassay Analyzers

For Roche Immunoassay Systems

- ◇ Elecsys 2010, 1010
- ◇ Cobas e411, e601, e602, e801
- ◇ Modular E170

Contrast Experiment Paper

B3841	System Cleaning	100mL	
B3817	Tips	120×30	4 boxes/carton
B3818	Cups	60×60	4 boxes/carton

● Product Features

All products are interchangeable with Roche original products. Generally perfusion or calibration is not required, it doesn't affect the results, long-term use can extend the service life of the measuring cell.

The following has been verified by various clients, the results of using Biolog reagents and Roche original reagents are highly correlated, with no significant difference. The quality control results are all within the $\pm 2SD$ range.

- Hormones: Cortisol, Estradiol, FSH, HCG, HCG +, LH, Progesterone, SHBG, Prolactin, Testosterone
- Thyroid Function: Anti-Tg, Anti-TPO, FT3, FT4, T3, T4, TSH
- Tumor Markers: AFP, CA 125, CA 153, CA 199, CA 724, CEA, Cyfra 21-1, free PSA, NSE, total PSA
- Infectious diseases: Hepatitis B, Hepatitis C, HIV
- Myocardial markers: CK - MB, Digitoxin, Myoglobin, pro BNP, Troponin T
- Others (Bone Markers, Diabetes, Allergies, Anemia) P1NP, PTH, IgM, IgE, VB12, Folate, Ferritin, Insulin, C-peptide
